Professional Summary

Results-driven Full-Stack & Cross-Platform Developer with 4+ years of freelance experience delivering scalable web, mobile, and desktop applications. Developed and maintained multiple client-focused solutions using React, Flutter, Firebase, Python, and .NET technologies, improving workflow efficiency and user engagement. Skilled in frontend engineering, backend integration, REST API development, and real-time systems with a strong focus on clean architecture, performance optimization, and intuitive user experiences.

Experience

Freelance Software Developer

2020 – Present

Truelancer

- Developed 15+ responsive web and mobile applications for clients across education, finance, and productivity sectors.
- Built scalable full-stack applications using React, React Native, Firebase, REST APIs, and SQL databases, improving application performance and maintainability.
- Collaborated directly with clients to gather requirements, redesign interfaces, and enhance UI/UX, increasing usability and client satisfaction.
- Automated workflows and management systems using Python, C#, and JavaScript, reducing repetitive manual tasks and improving operational efficiency.
- Maintained reusable, version-controlled codebases using Git and modern development workflows for faster deployment and easier collaboration.

Education

Bachelor of Science (BSc) in Computer Science & Engineering

East West University

2026 – Present

Relevant Coursework: Software Engineering, Data Structures, Algorithms, Database Systems, Mobile Application Development, Web Technologies.

Technical Skills

Python	90%
JavaScript / TypeScript	88%
React / React Native	85%
Flutter	80%
Firebase / APIs	84%
C# / .NET	78%

Frontend: React, React Native, Flutter, HTML5, CSS3, XML
Backend: REST APIs, Firebase, Authentication Systems
Databases: SQL, Firebase Firestore, Firebase Realtime Database
Tools: Git, Android Studio, Visual Studio, Unity, VS Code

Projects

Portfolio Website

- Developed a modern responsive portfolio website showcasing projects, technical skills, and achievements.
- Optimized performance and mobile responsiveness to improve accessibility across devices.

CredoTrack – Debt Tracking System

- Built a financial management application for tracking debts, repayments, and transactions in real time.
- Designed interactive dashboards for monitoring expenses and financial records efficiently.

TeachSync – Tuition Management Platform

- Created a tuition management platform for handling schedules, attendance, students, and payment records.
- Automated repetitive administrative workflows to improve efficiency and organization.

MyRamadan – Productivity App

- Designed a productivity application for tracking fasting, prayers, habits, and personal goals.
- Added progress tracking and motivational features to improve user engagement.

Muhib's Den – Real-Time Chat Application

- Developed a real-time messaging application using Firebase and modern frontend technologies.
- Implemented authentication, live chat functionality, and responsive UI components.

Certifications

- Public Speaking Fundamentals – Muktopaath

Languages

- English – Professional Working Proficiency
- Bengali – Native Proficiency

Additional Information

- Strong understanding of software development lifecycle, clean architecture, and scalable application design.
- Experienced in cross-platform application development, real-time systems, and Firebase-based solutions.
- Passionate about emerging technologies, UI/UX improvements, and problem-solving through software engineering.
